

# Incubation and Egg Hatch Record

Egg #	Set Date	Breed	Candling		Fertile?		Lock Down Date	Hatch Date	Notes
			Day 8	Day 18	Day 8	Day 18			

### Other Important Numbers

Day 1 Temp	
Day 1 Humidity	
Lock Down Temp	
Lock Down Humidity	
# of Eggs Set	
# of Eggs Hatched	
Hatch Rate %	

### Recommendations

**Temperature**  
 Forced-air incubator (with a fan)  
 99.5 degrees F (acceptable range 99-100)  
 Still-air incubator (no fan): shoot for a range between 100 and 101 degrees F

**Humidity**  
 First 18 days the recommended range of relative humidity for chicken eggs is 45-55%  
 Final 3 days increase humidity to 60-65%

\*\* Unless manually turning it is best to not handle eggs as much as possible  
 \*\* It is always a good practice to wash your hands before you touch the eggs
