PREBIOTICS + OREGANO

RECOVER 911™	PRODUCT PURPOSE	AGE	SIGNS AND SYMPTOMS
	Support during severe stress	All birds	Labored breathing Loss of appetite and thirst Not laying eggs Severe diarrhea/pasty butt Lethargy Isolation from others

TO SUPPORT SEVERE STRESS

A stressed chicken needs more than just feed. Causes of severe stress for chickens include prolonged weather extremes, social hierarchy, predator attacks, and exposure to germs. Providing probiotics, prebiotics, oregano, and electrolytes during those stressful periods can support the health of your chickens by helping to reduce bad bacteria and preventing dehydration.

FlockLeader™ Recover 911™ promotes immunity and reduces the risk of mortality during times of severe stress.

At Perdue, we have been caring for chickens for more than 100 years. In fact, the backyard flock of our founders, Pearl and Arthur Perdue, started it all! To this day, we remain dedicated to raising strong, healthy, and happy birds through science and innovation.

Directions for Use

Add one teaspoon of FlockLeader Recover 911 per gallon of water. During times of stress or hot weather we recommend applying FlockLeader Recover 911 for 7 consecutive days. Discard any
